DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1, 3, and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Medhkour et al (US 6,493,589). Medhkour et al discloses a method of reducing lung size of a lung, including the steps of inserting a conduit down a trachea, into a mainstem bronchus, into a bronchial branch, and into a bronchial sub-branch communicating with a lung portion of the lung to be reduced in size, pulling a vacuum in the lung portion through the conduit to collapse the lunge portion and deploying an obstructing member in the bronchial sub-branch to preclude air from being inhaled into the lung portion through the bronchial sub-branch (Column 9, Lines 5-8; Column 11, Lines 40-52; Column 12, Lines 13-23; Column 12, Lines 63-67).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Medhkour et al in view of Dayal (US 5,660,175). Medhkour et al teaches all of the claimed limitations except the step of advancing the obstructing member/plug through a conduit/catheter and into the bronchial sub-branch/air passage. Dayal discloses advancing the obstructing member/plug (7) through a conduit/catheter (1) and into the bronchial sub-branch/air passage (Column 8, Lines 27-50; Figure 12E). It would have been obvious to one with ordinary skill in the art to use the teachings of Dayal to modify the invention of Medhkour et al and advance the obstructing member of Medhkour et al down a catheter/conduit of Dayal since the inflatable cuff on the catheter/conduit of Dayal can provide the effect of stabilizing and sealing the catheter/conduit to the trachea before the inflating of Medhkour et al's obstructing member.
